

# GLOBAL CODE of ETHICS

## 8 June 2023 – European Association for Supervision and Coaching (EASC) are now the 11th signatory to the Global Code of Ethics

The Global Code of Ethics supports excellence in the development of coaching, mentoring, and supervision and raises the standards of practice of members. It was created by two professional associations, Association for Coaching ('AC') and European Mentoring and Coaching Council ('EMCC'), in February 2016.

Since then, more organisations have signed up for the Code and **we are very pleased to announce that EASC becomes the 11th Co-Signatory of the Global Code of Ethics (GCoE)**

Susanne Rieger, President of the European Association for Supervision and Coaching (EASC) commented, *"We are very pleased to be the 11th Co-signatory of the Global Code of Ethics (GCoE). As a European professional association for coaches and supervisors, we are committed to upholding ethical guidelines. Ethics are of great importance to our professions. At the same time, the implementation of high-quality standards and European and international networking are central to us as an association. Therefore, we feel and know that the Global Code of Ethics (GCoE) is a good fit for us. We commit ourselves as a board on behalf of our members to do our utmost to bring this "Global Code of Ethics" to life and to comply with it."*

The current signatories continue to invite other world-wide professional bodies in the field to join this initiative and become organisational signatories.

This code has a wide impact by informing the work of people who may not be members of the signatory bodies but who practice coaching, mentoring, supervision, and training related activities or are sponsors, users, beneficiaries, and purchasers of such services – anywhere around the world.

The Code has its own dedicated website – [www.GlobalCodeofEthics.org](http://www.GlobalCodeofEthics.org) - where the code is translated into a number of the world's main languages. The latest version of the Global Code of Ethics can be viewed [here](#).
